
ENDICOTT™

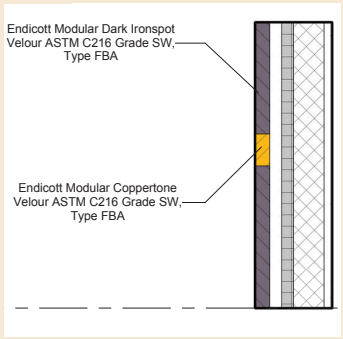
BIM STANDARD MODELS

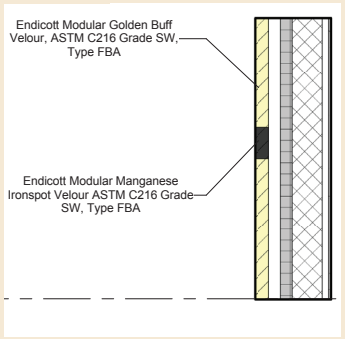
Quality brick models for quality projects

Chester County Technical College High School - West Grove, PA

Endicott Clay Products Co/Endicott Tile LLC information rich BIM models were specially created for projects that use brick. Each model has large amounts of information as well as good graphics for top of the line renderings. The models are easy to use. Simply placing the material into the project gives you all the information you need to face your project in a quality brick. Endicott can even provide custom blends and patterns allowing you the ability to see how good you will look using Endicott. If you are going to use quality brick, start with quality models.

Renderings can demonstrate the custom patterns desired in the project.





Endicott models contain accurate information, so changing the material is reflected throughout out the project.

Contact your local distributor, our main office (John Ragland), or go to our website for your quality Endicott BIM models.

Endicott provides models of our top colors and sizes in facebrick and thin brick, but it doesn't stop there. Endicott has models for murals and fireplaces, allowing you the opportunity to design with confidence.
